Commune or Nothing!

Venezuela's Communal Movement and Its Socialist Project

Chris Gilbert

Titled after the rallying cry of Venezuela's communards, *¡Comuna o Nada!*, *Commune or Nothing!* portrays an expanding network of socialist communes pursuing the strategic goal of overcoming the entire capitalist economy and transcending the state formations upon which the capital system relies. It is a viable alternative to the increasingly exploitative, destructive, and unsustainable capital system. Like the trailblazing movement it depicts, *Commune or Nothing!* offers important lessons not only regarding the construction of socialism in Venezuela but for socialist praxis worldwide.

CHRIS GILBERT is a professor of political studies at the Universidad Bolivariana de Venezuela and creator and co-host of *Escuela de Cuadros*, a Marxist educational television program and podcast. Gilbert is coauthor of *Venezuela, The Present as Struggle* (2020).

"Invaluable! With clarity and insight that could only come from years of study and practical engagement, Chris Gilbert provides a historical and political framework for understanding the complexities involved in attempting to build new societies in the womb of the old."—AJAMU BARAKA, NATIONAL ORGANIZER, BLACK ALLIANCE FOR PEACE

"Written by a fellow traveler of our movement, this book uses the lenses of Marxism, social reproduction, feminism, and history to understand a concrete process of socialist construction. In so doing, it reveals the enormous emancipatory potential of Venezuela's communal movement and also its challenges."—BÁRBARA "ANACOANA" MARTÍNEZ, COMMUNARD LEADER EL PANAL COMMUNE

"In this theoretically informed study, Chris Gilbert reveals how productive forces (human and material) are developing in the Venezuelan communes as they struggle to overcome obstacles both economic and political. We learn here along with Gilbert and the communards themselves how the establishment of social relations of protagonistic democracy and direct social labor builds new capacities, pride, and dignity."—MICHAEL A. The Myth of Black Capitalism

It was Richard Nixon who first introduced the notion of “Black capitalism” into mainstream American discourse, coopting the term at a time when African Americans comprised only 3 percent of the nation’s employers. That number dwindled thereafter, and yet the term only gained cachet following the election of Barack Obama and the increased visibility of the black elite. Thankfully, just as the rhetoric of “black capitalism” is being resuscitated, it is being confronted once more.

In this second edition of Earl Ofari’s classic book, the author adds a new introduction, which shows both the enduring strength of the ideology of Black capitalism and its continued inability to change the nature of what has always been a racialized system of production and distribution. Moreover, Black capitalism is a diversion from the struggle for liberation that works at cross purposes with the fight against exploitation, and a fantasy that enriches a minuscule few at the expense of the many. *The Myth of Black Capitalism* argues definitively that only a direct assault on the oppression of Black people and the capitalist system itself can bring this exploitation to an end.

EARL OFARI HUTCHINSON has been a frequent guest on CNN and MSNBC and co-hosted the *Al Sharpton Show* for nearly a decade. Hutchinson hosts the live call-in program *The Earl Ofari Hutchinson Show* on Pacifica Radio and is a nationally acclaimed author and social issues commentator.

Until We Fall

Long Distance Life on the Left

Helena Sheehan

Most Westerners watched the breakup of the Soviet Union at a great distance, through a highly distorted lens that equated the expansion of capitalism with the rise of global democracy. But there were those, like Helena Sheehan, who watched more keenly. In her new autobiographical history from below, *Until We Fall*, Sheehan shares what she witnessed first-hand and close-up, as hopes were raised by glasnost and perestroika, only to be swept away in the bitter and brutal counterrevolutions that followed.

As a philosopher, she scrutinizes the various intellectual currents prevailing, particularly positivism and postmodernism, and makes a persuasive case for the explanatory and ethical superiority of Marxism. As she moves through time and space, Sheehan pursues the perspectives of the vanquished in a world where the triumphalist narratives of the victors hold sway, in a time when the old is dying and the new cannot be born, when capitalism is decadent yet still dominant.

The Knowledge Economy and Socialism

Science and Society in Cuba

Agustín Lage Dávila

In 1960, Fidel Castro said that Cuba's future would be one of science and thought. As Agustín Lage Dávila shows, Cuba has become a global leader in both the generation of scientific knowledge and its application to the production of socially useful products, from vaccines and medicines to organic food. Dr. Lage shows how Cuba has achieved such prominence, positing that the training of its scientists, their scientific practices, and their relationship with the Cuban people are intimately connected to the socialist culture that derived from the Cuban Revolution.

Lage offers clearly written and easily understood answers to questions critical to the very survival of humanity. Why is culture critical to science? What distinguishes Cuba's socialist culture from that of capitalist societies? What are the social responsibilities of scientists? How has Cuba made such incredible scientific advances in the face of the brutal and illegal U.S. blockade? How can a country like Cuba earn needed foreign exchange through the sale of its knowledge-intensive products to the countries of the Global North while maintaining its ethical, socialist ideals?

Lage's interrogation of these questions will be of interest to scientists around the world, to all those struggling for a better world, and, no doubt, even to those corporations competing with Cuba in global markets.

AGUSTÍN LAGE DÁVILA is an internationally renowned and respected immunologist. He was for many years director of the Cuban Center of Molecular Immunology. A dedicated communist, he has been at the forefront of scientific education and economic development through science in Cuba.

The Prosecution of Professor Chandler Davis

McCarthyism, Communism, and the Myth of Academic Freedom

Steve Batterson

In this fascinating and disturbing narrative, author Steve Batterson tells the true tale of Chandler Davis, a mathematician whose life's work was profoundly affected by the anticommunist actions of the government and personnel at the University of Michigan. Courageously asserting the First Amendment to confront a system rapidly descending into authoritarianism, Davis testified before the House Un-American Activities Committee. In the process, Batterson exposes the ways that McCarthy's righteous emissaries relied on all kinds of institutions in 1950s America—from Hollywood studios to universities—to sabotage the careers of anyone with a trace of "Red."

The Dialectics of Ecology

Socialism and Nature

John Bellamy Foster

The fate of the earth as a home for humanity hangs by a thread—and yet, contends John Bellamy Foster, the reunification of humanity and the earth remains possible if we are prepared to make revolutionary changes. As with his prior books, *The Dialectics of Ecology* is grounded in the contention that we are now faced with a desperate choice between ecological socialism and capitalist exterminism, and rooted in insights drawn from the classical historical materialist tradition. In this latest work, Foster explores the complex theoretical debates that have arisen historically with respect to the dialectics of nature and society. He then goes on to examine the current contradictions associated with the confrontation between capitalist extractivism and the financialization of nature, on the one hand, and the radical challenges to these represented by emergent visions of ecological civilization and planned degrowth, on the other.

The product of contemporary ecosocialist debates, *The Dialectics of Ecology* builds on earlier works by Foster, including *Marx's Ecology* (2000) and *The Return of Nature* (2020), aimed at the development of a dialectical naturalism and the formation of a path to sustainable human development.

Ron Carey and the Teamsters

How a UPS Driver Became the Greatest Union Reformer of the Twentieth Century by Putting Members First

In this riveting account, retired UPS driver and unionist Ken Reiman gives us the first in-depth portrait of Ron Carey as he rose from a local union officer in the mid-1960s to president of what was, in 1991, the largest labor union in the United States.

For many years, the International Brotherhood of Teamsters was one of this country's most corrupt unions, with close ties to organized crime. Hundreds of officers drew enormous salaries while doing no work. Pension funds were drained to build Las Vegas casinos. Ultimately many Teamster leaders were either sent to prison or killed, and Carey and the Teamsters were able to defeat UPS and their many enemies, tangibly transforming the lives of countless workers in the process.

Drawing on transcripts from court hearings, public records, newspapers, and over fifty first-person interviews, Reiman brings us the fascinating, untold story of Carey's heroic efforts.

KEN REIMAN worked for UPS for over thirty-three years as both a package car driver and preloader. He became politically active after he and his fellow unionists witnessed the attacks on Ron Carey. In the years that followed he joined Teamsters for a Democratic Union, was elected as a business agent for 804 Members United on a reform slate, and became the writer, publisher, and distributor of his local's newsletter, *The Local Agitator*.

"A wonderful effort by a longtime member. . . . Reiman blends his own perspective, always with care and always with insight and inspiration. This is as much about reform efforts in the union—fighting mob-based corruption and sickening employers—as it is about Carey himself. The 1997 membership mobilization was the basis for the outstanding contract campaign at UPS in 2023."

Postcards to Hitler

The Story of a German Jew's Defiance in a Time of Terror

Bruce Neuburger

Postcards to Hitler tells the story of a Jewish family in Munich living as close neighbors to Adolf Hitler as passionately told by one of their descendents. As the narrative begins Benno Neuburger, a modest German land investor from Munich, and Anna Einstein, daughter of a cattle dealer, meet at a seder in Laupheim and soon marry. The year is 1907, a relatively prosperous, optimistic time for German Jews. It is not clear that this good fortune might soon unravel even with the news of an assassination in an "obscure" Balkan corner of the continent.

In the aftermath of Germany's defeat in the First World War, Munich becomes the epicenter of German fascism fed by national resentment and racial madness reflecting simmering European rivalries and colonialism. Through it all, Benno and Anna and their extended families cling to the vain hope of a peaceful resolution to the multiplying crises. But a bloody pogrom, a new war, evictions, and "resettlements" sound the inescapable knell despite desperate and defiant acts of resistance.

Postcards to Hitler is a deeply researched history drawn from personal interviews and archival documents including Benno's and Anna's final letters—written amid a slow-moving parade of horror as the frail boundaries between themselves and the Holocaust ultimately vanish.

Let Me Speak! is a moving testimony from inside the Bolivian tin mines of the 1970s by a woman whose life was defined by her defiant struggle against those at the very top of the power structure, the Bolivian elite. Blending firsthand accounts with astute political analysis, Domitila Barrios de Chungara describes the hardships endured by Bolivia's colossal working class and her own efforts at organizing women in her mining community. The result is a gripping narrative of class struggle and repression, an important social document that illuminates the reality of capitalist exploitation in the dark mines of 1970s Bolivia and beyond.

Twenty-five years after it was first published in English, this new edition picks up Domitila's life story with the 1977 hunger strike she organized that brought down the Banzer dictatorship. It then turns to her subsequent exile in Sweden and work as an internationalist seeking solidarity with the Bolivian people in the early 1980s, during the period of the García Meza dictatorship. It concludes with the formation of the Domitila Mobile School in Cochabamba, where her family had been relocated after the mine closures. Domitila's insights range from observations on U.S. imperialism and environmental crisis to the need for political organizing capable of unifying working-class and social movements.

DOMITILA BARRIOS DE CHUNGARA (1937–2013) was the daughter of a mine worker and lived most of her life in a tin mining camp in the Bolivian highlands. Domitila was invited to testify at the first UN Conference on Women, Development, and Peace in 1975 where she met Moema Viezzer. *Let Me Speak!* has been translated into fourteen languages. **MOEMA VIEZZER** is a Brazilian sociologist and popular educator who has dedicated her life to women's causes and environmental issues. Viezzer continues to fight for the international recognition and application of the Declaration of the Rights of the Mother Earth—Pachamama—with an emphasis on the rights of water. She is the author of eight books.

Western Marxism

How It Was Born, How It Died,
How It Can Be Reborn

Domenico Losurdo

Edited with an introduction by Gabriel Rockhill

Western Marxism is a paradigm-shifting book that provides a trenchant critique of the Western left intelligentsia. It reveals how its dominant ideological orientation—characterized by defeatism, utopianism, and anti-communism—is rooted in the political economy of imperialism. Internationally acclaimed theorist Domenico Losurdo thus provides a fresh and challenging perspective on purportedly radical thinkers who have been widely promoted in the imperial core, including those affiliated with the Frankfurt School, French Theory, and operaismo, as well as Hannah Arendt, Giorgio Agamben, Michael Hardt, and Slavoj Žižek, among others. His critique also has wide-reaching implications for trend-setting discourses inspired by this coterie of intellectuals, from postcolonial and decolonial theory to subaltern studies and beyond. Far from being a negative undertaking, however, this book is grounded in the positive project of reigniting anti-imperialist Marxism.

As a complement to his original book, this volume includes a capacious introduction to Losurdo's expansive body of work and the first publication of a major lecture that demystifies Western Marxism by demonstrating how it has been a useful tool for Western imperialism's denigration of the achievements of actually existing socialism. Raising the stakes of what it means to produce critical theory, this book will surely provoke wide debate and a reevaluation of hallowed canons.

John Bellamy Foster

"John Bellamy Foster has returned Marxism to a serious and sincere engagement with nature. He is as adept at navigating the latest scientific literature as he is comfortable with the immense body of Marxist theory. He is a key reference for the elaboration of our political struggles and for the expansion of our political imagination."

—VIJAY PRASHAD, DIRECTOR, TRICONTINENTAL:
INSTITUTE FOR SOCIAL RESEARCH

JOHN BELLAMY FOSTER is professor of sociology at the University of Oregon and editor of *Monthly Review*.
